Summary

I am a versatile individual with a broad skill set spanning electronics, mechanical engineering, and software development. My extensive experience includes working on blockchain systems, artificial intelligence, and data science projects. As a highly self-motivated individual, I am actively seeking an internship opportunity within a reputable organization where I can leverage my skills and contribute wholeheartedly to the company's goals.

Experience

Fulltime Student

Kumoh National Institute of Technology

Sep 2022 - Present (1 year 1 month)

I have a strong passion for Information Technology (IT) and possess a keen aptitude for working with numbers, allowing me to perform intricate calculations and analyses proficiently. Additionally, my self-motivated nature ensures that I can excel in my tasks with minimal supervision.

Education

Kumoh National Institute of Technology

Master's degree, Computer Software Engineering

Sep 2022 - Aug 2024

I am currently pursuing a master's degree at Kumoh Institute of Technology. In addition to my academic pursuits, I hold a full-time position as a researcher at the Network Systems Lab (NSL). My research experience has encompassed diverse projects, including work on anti-drone technology, surgical robots, enhancing medical record security through blockchain, and implementing artificial intelligence in Service Drive for Automotive Retail Dealerships.

International Islamic University Malaysia

Bachelor's degree, Mechatronics, Robotics, and Automation Engineering

Jul 2017 - Jan 2022
